	<b>HAFRAN Servicios Múltiples, C.A.</b> It's a Venezuelan engineering and construction firm specializing in maintenance, procurement, and infrastructure projects for the oil, gas, and petrochemical sectors. With decades of experience, the company provides comprehensive technical services and specialized equipment for high-scale industrial operations.	
	<b>ASINCRO</b> It's a prominent Venezuelan engineering and consulting firm specializing in high-impact energy, oil, and infrastructure projects. With over 40 years of experience, the company provides comprehensive technical solutions ranging from feasibility studies to full-scale industrial construction management.	
	<b>Cemento Andino</b> It's a major Venezuelan industrial producer specialized in the manufacturing and distribution of high-quality cement and construction materials. Operating primarily in the Andean region, the company provides essential supplies for large-scale infrastructure and residential development projects nationwide.	
	<b>CH4 Systems LLC</b> It's an American engineering and service provider specializing in technical solutions for the oil, gas, and energy industries. The company focuses on procurement, project management, and the supply of specialized industrial equipment for global infrastructure operations.	
	<b>Carabobo Ingeniería y Construcciones S.A. - CICSA</b> Created by Repsol, ONGC, Indoil, Oil India for the coordination and construction of the Petrocarabobo S.A. facilities in Venezuela	
	<b>Consorcio EIS</b> Made up of the companies Electrowatt, Inelectra and Seprobanca, was a strategic engineering partnership that executed major infrastructure and technical projects for the Venezuelan oil and power sectors. It specialized in EPC and specialized industrial maintenance for high-priority national energy facilities.	
	<b>CONTROVAL</b> It's a leading engineering and automation firm providing specialized control systems, instrumentation, and valve solutions for the energy and industrial sectors. For over 30 years, they have focused on optimizing processes for oil, gas, and power generation facilities across Latin America.	
	<b>Constructora Vial y Civil Onca, C.A. - CVCONCA</b> It's a Venezuelan engineering firm specializing in large-scale civil works and road infrastructure projects. The company focuses on the design, construction, and maintenance of highways, urban bridges, and industrial earthworks for both public and private sectors.	
	<b>CVG Aluminio</b> It's a key Venezuelan state-owned manufacturer dedicated to the production and smelting of primary aluminum. It serves both domestic and international markets, providing essential raw materials for the automotive, construction, and packaging industries.	
	<b>FAVE Global Solutions, C.A. - FAVE</b> It's a specialized industrial service provider focused on procurement and technical engineering for the oil, gas, and petrochemical sectors. The firm delivers integrated supply chain solutions and equipment for heavy infrastructure projects across Latin America.	
	<b>HAFRAN Servicios Múltiples, C.A.</b> It's a Venezuelan engineering and construction firm specializing in maintenance, procurement, and infrastructure projects for the oil, gas, and petrochemical sectors. With decades of experience, the company provides comprehensive technical services and specialized equipment for high-scale industrial operations.	
	<b>ICM Proyectos 2001, C.A.</b> It's a Venezuelan engineering and construction firm specializing in the design, maintenance, and execution of large-scale projects for the oil, gas, and energy sectors. The company provides integrated technical solutions, including electromechanical assembly and industrial infrastructure development.	
	<b>INELECTRA S.A.C.A.</b> It's a premier Venezuelan engineering and construction corporation with over 50 years of experience in the energy and industrial sectors. The firm specializes in providing comprehensive EPC (Engineering, Procurement, and Construction) solutions for complex oil, gas, and power generation projects worldwide.	
	<b>Consorcio INE-PETCO</b> It was a specialized engineering and services joint venture focused on the operation and maintenance of oil and gas infrastructure. The company provides technical expertise and integrated project management solutions for high-scale hydrocarbon extraction and processing facilities.	
	<b>INSERVEN</b> It's a specialized engineering firm providing maintenance, electromechanical assembly, and technical support for the power and oil sectors. They focus on the rehabilitation and optimization of high-capacity industrial facilities and energy infrastructure.	
	<b>Metanol de Oriente, S.A. - METOR</b> It's a major Venezuelan petrochemical company focused on the large-scale production and export of high-purity methanol. Operating as a joint venture, the firm utilizes advanced technology to supply chemical feedstock for global industrial and fuel markets.	
	<b>NEGROVEN, S.A.</b> It's a prominent Venezuelan manufacturer specializing in the production of high-quality carbon black for the global tire and rubber industries. The company utilizes advanced chemical processes to provide essential reinforcing fillers and pigments for automotive and industrial applications.	
	<b>RAFAY Ingenieros, C.A.</b> It's a specialized Venezuelan engineering and consultancy firm focused on the design, supervision, and execution of complex infrastructure projects. The company provides technical expertise in civil, mechanical, and electrical engineering for the industrial and service sectors.

	<p><b>Refinería Dominicana de Petróleo PDV, S.A. - REFIDOMSA</b>            It is the Dominican Republic's leading petroleum refiner, responsible for importing, refining, and distributing hydrocarbons. It plays a critical role in the nation's energy security by supplying high-quality fuels for domestic industrial and transport sectors.</p>	
	<p><b>Sterigenics U.S., LLC</b>            It's a key provider of mission-critical sterilization services, specializing in Electron Beam (E-Beam) technology for the medical device and pharmaceutical sectors. Located in the Coyo Free Zone, it supports the region's life sciences hub by ensuring the safety and sterility of healthcare products.</p>	
	<p><b>TECNOCONSULT S.A.</b>            It's a leading Venezuelan engineering firm specializing in EPC (Engineering, Procurement, and Construction) services for the oil, gas, and petrochemical industries. With over 50 years of experience, the company provides technical solutions for large-scale infrastructure and industrial projects across the region.</p>	
	<p><b>Venezolana de Proyectos Integrados C.A. - VEPICA</b>            It's a multinational engineering firm providing comprehensive EPC (Engineering, Procurement, and Construction) solutions for the energy, oil, and gas sectors. With a global presence, the company specializes in complex industrial infrastructure, renewable energy projects, and technical consultancy.</p>	
	<p><b>VHICOA Venezuelan Heavy Industries C.A..</b>            It's a leading engineering and fabrication firm specializing in high-complexity steel structures and heavy mechanical equipment. The company provides essential infrastructure components, such as pressure vessels and modular bridges, for the global oil, gas, and power sectors.</p>	
	<p><b>WISON Engineering LTD</b>            It's a leading international EPC (Engineering, Procurement, and Construction) service provider specializing in the petrochemical, coal chemical, and oil refining sectors. The firm delivers high-end technical solutions and project management for large-scale energy infrastructure projects worldwide.</p>	
	<p><b>Y&amp;V Ingeniería y Construcción, C.A.</b>            It's a prominent engineering and construction firm providing comprehensive EPC solutions for the energy, industrial, and infrastructure sectors. They specialize in project management and technical consultancy for complex oil, gas, and power generation facilities across Latin America.</p>	
	<p><b>YPergas, S.A.</b>            It's a Venezuelan joint venture focused on the exploration, production, and processing of non-associated natural gas. Strategically partnered with PDVSA Gas and international firms, it plays a vital role in supplying energy to the domestic industrial and power sectors.</p>
